Contact Information 38

From 2001 to 2005...

- There were 34,138 lost-time claims from workers in the Manufacturing, Processing and Packaging industries. Of those, 35.9% involved Primary Metal (especially steel) Products, 16.4% Wood Products, and 14.1% Meat, Hides and Pelt Products.
- Sprains, strains and tears were the most common nature of injury, accounting for 40.6% of the total lost-time claims.
- The trunk was the most common body part injured, accounting for over one-third of the total claims.
- Incident types involving overexertion or being struck by objects accounted for 38.6% of all claims.
- Workers aged between 25 and 44 years accounted for 56.2% of lost-time claims.
- Claims requiring between one and five days off work accounted for 45.6% of all injuries or diseases.

In 2005...

- The Workers' Compensation Board (WCB) – Alberta accepted 6,460 lost-time claims from Manufacturing, Processing and Packaging workers, representing 18.2% of all lost-time claims in the province.
- The lost-time claim rate for the Manufacturing, Processing and Packaging industries was 3.4 per 100 person-years. The 2004 provincial lost-time claim rate was 2.4 per 100 person-years.
- The duration rate for the Manufacturing, Processing and Packaging industries was 62 days lost per 100 person-years, slightly higher than the provincial duration rate of 57.
- The Gases, Fertilizer and Petrochemical – Refining and Manufacturing sub-sector had the lowest lost-time claim rate of all Manufacturing, Processing and Packaging sub-sectors at 0.4 per 100 person-years. Meat, Hides and Pelt Products had the highest lost-time claim rate at 6.5 per 100 person-years.

- Employers with 20 to 39 person-years had the highest lost-time claim rate at 4.6 per 100 person-years.

- Almost five per cent of employers in the Manufacturing, Processing and Packaging industries had a valid Certificate of Recognition (COR).

- The WCB accepted 19 occupational fatalities for compensation in the Manufacturing, Processing and Packaging industries, representing 13.3% of all workplace fatalities accepted in Alberta.

Section 1

INTRODUCTION

Role of Alberta Human Resources and Employment

Alberta Human Resources and Employment (AHRE) provides a continuum of services and information to support the development of a skilled and productive labour force; fair, safe, healthy and productive workplaces; and helping improve the well-being of Albertans. AHRE develops and delivers programs and services that contribute to workplaces for employees and employers by:

- working with industry and safety associations to audit and certify health and safety programs
- helping employers, employees, unions and industry associations work together by offering facilitation services, workshops and partnership opportunities
- developing and maintaining policy and legislated employment standards in Alberta
- preparing and providing ongoing support of Alberta's workplace health and safety regulations
- explaining legislated standards under the *Occupational Health and Safety Act* and the *Employment Standards Code* and ensuring compliance through complaint resolution, investigation and targeted inspections.

Occupational Injuries and Diseases in the Manufacturing, Processing and Packaging Industries 2001 to 2005

Each year, AHRE prepares a report on the occupational injuries and diseases in the Manufacturing, Processing and Packaging industries. The purpose of this report is to provide government, employers, workers, and health and safety professionals in the Manufacturing, Processing and Packaging industries with information about key health and safety issues. This report includes:

- an estimation of the risk of injury or disease in addition to general descriptive information about incidents and injured workers
- the number of employers that earned a Certificate of Recognition (COR)
- occupational fatalities accepted by the WCB for compensation and fatality rates for the Manufacturing, Processing and Packaging industries.

Notes about this report:

- This report presents 2005 data beside 2004 data to help with comparisons. Additional historical data are presented where possible.
- Throughout the report, the lost-time claim rate is the number of claims per 100 person-years, and the duration rate is the number of days lost per 100 person-years.
- Estimates of year-on-year change presented in this report are calculated using unrounded figures and may not match those produced from rounded figures.
- In 2005, improvements have been made to the data collection. A stricter definition of a lost-time claim has been adopted and applied to the data covering the period 2001 to 2005. Previously, a small proportion of modified-work claims were also captured as lost-time.
- Improvements have also been made in the analysis by workers occupation. The 2001 National Occupation Classification (NOC) has been adopted for the presentation of figures by occupation. The NOC 2001 provides a standardized framework reflecting the Canadian labour market. For further information please see http://www23.hrdc-drhc.gc.ca/2001/e/generic/welcome.shtml
- Terms, definitions and formulas are described in Appendix A. Industry codes are listed in Appendix B.

SECTION 2

LOST-TIME CLAIM RATE AND DURATION RATE

The lost-time claim rate[1] represents the probability or risk of a disabling injury or disease to a worker during a period of one year. The 2005 lost-time claim rate for the Manufacturing, Processing and Packaging industries was 3.4 per 100 person-years.

In 2005, there were 6,460 lost-time claims in the Manufacturing, Processing and Packaging industries, representing 18.2% of the total lost-time claims in the province. The Manufacturing, Processing and Packaging industries' lost-time claim rate was 3.4 per 100 person-years, a increase of 2.7% from 2004 (see Table 2.0). The 2005 provincial lost-time claim rate was 2.4 per 100 person-years. The lost-time claim rate of 3.4 per 100 person-years translates to 17 lost-time claims per million hours worked.

The duration rate is intended to show the severity of the effects of occupational injury and disease as reflected by the number of days off work per 100 person-years. In 2005, the Manufacturing, Processing and Packaging industries had a duration rate of 62, the lowest during the last five years and slightly higher than the provincial duration rate of 57.

Table 2.0
Manufacturing, Processing and Packaging Industries — Alberta: 2001-2005

Year	Number of Claims	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	11,414	$29,739,425	166,863	188,036	113	8,184	4.9
2002	11,540	$30,565,075	172,589	169,163	98	6,961	4.0
2003	11,632	$27,755,884	174,430	142,517	82	6,452	3.7
2004	11,997	$27,097,818	182,098	115,966	64	6,081	3.3
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

Data Source: 2005 WCB Data. Prepared by Data Development and Evaluation

[1] The rate has been calculated from lost-time claims data as of March 31, 2006. This rate underestimates the risk of occupational injury and disease since some lost-time claims that occurred in 2005 were not administered by March 31, 2006.

SECTION 2

LOST-TIME CLAIM RATE AND DURATION RATE

The lost-time claim rate[1] represents the probability or risk of a disabling injury or disease to a worker during a period of one year. The 2005 lost-time claim rate for the Manufacturing, Processing and Packaging industries was 3.4 per 100 person-years.

In 2005, there were 6,460 lost-time claims in the Manufacturing, Processing and Packaging industries, representing 18.2% of the total lost-time claims in the province. The Manufacturing, Processing and Packaging industries' lost-time claim rate was 3.4 per 100 person-years, a increase of 2.7% from 2004 (see Table 2.0). The 2005 provincial lost-time claim rate was 2.4 per 100 person-years. The lost-time claim rate of 3.4 per 100 person-years translates to 17 lost-time claims per million hours worked.

The duration rate is intended to show the severity of the effects of occupational injury and disease as reflected by the number of days off work per 100 person-years. In 2005, the Manufacturing, Processing and Packaging industries had a duration rate of 62, the lowest during the last five years and slightly higher than the provincial duration rate of 57.

Table 2.0
Manufacturing, Processing and Packaging Industries — Alberta: 2001-2005

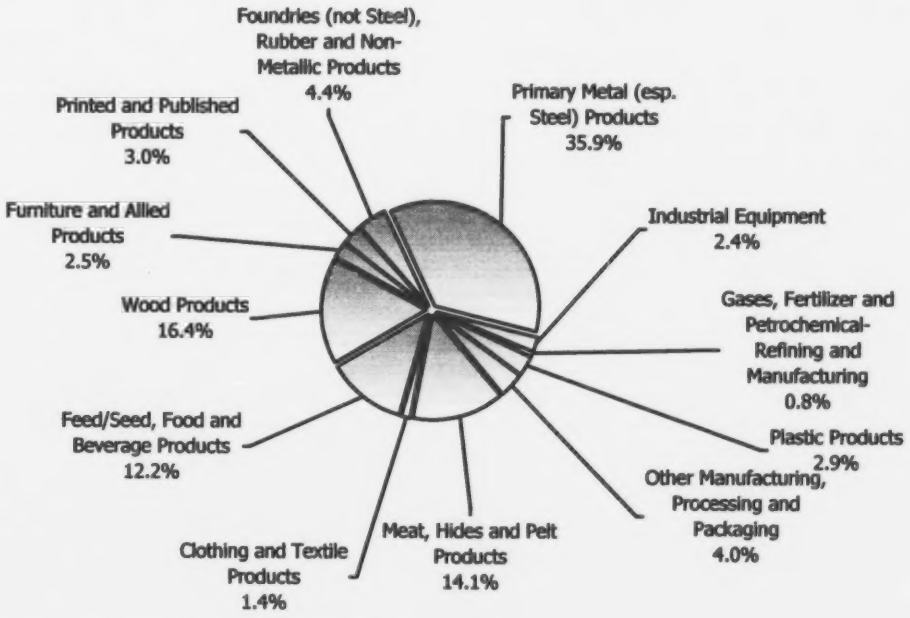
Year	Number of Accounts	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	11,414	$29,739,425	166,863	188,036	113	8,184	4.9
2002	11,540	$30,565,075	172,589	169,163	98	6,961	4.0
2003	11,632	$27,755,884	174,430	142,517	82	6,452	3.7
2004	11,997	$27,097,818	182,098	115,966	64	6,081	3.3
2005	**12,883**	**$29,756,553**	**188,345**	**116,031**	**62**	**6,460**	**3.4**

Data Source: 2005 WCB Data. Prepared by Data Development and Evaluation

[1] The rate has been calculated from lost-time claims data as of March 31, 2006. This rate underestimates the risk of occupational injury and disease since some lost-time claims that occurred in 2005 were not administered by March 31, 2006.

Between 2001 and 2005, there were 34,138 lost-time claims in the Manufacturing, Processing and Packaging industries. The Primary Metal (especially steel) Products sub-sector accounted for over one-third of total lost-time claims, followed by the Wood Products sub-sector at 16.4%. The Gases, Fertilizer and Petrochemical – Refining and Manufacturing sub-sector had the fewest lost-time claims at 0.8% (see Chart 2.0).

Chart 2.0
Percentages of Lost-Time Claims by Manufacturing, Processing and Packaging Sub-Sector — Alberta: 2001-2005



Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.1 Lost-Time Claim Rate by Size of Employer

In the Manufacturing, Processing and Packaging industries, employers with 20 to 39 person-years had the highest lost-time claim rate at 4.6, followed by employers with 10 to 19 person-years at 4.4. Employers with less than 10 person-years and employers with 100 or more person-years both had the lowest lost-time claim rate at 3.0 (see Table 2.1). For the province, employers with 20 to 39 and 40 to 99 person-years had the highest lost-time claim rate at 2.8, while employers with less than 10 person-years had the lowest at 2.2.

Table 2.1
Lost-Time Claim Rate by Size[2] of Employer — Alberta: 2005

Size of Employer	Number of Accounts	Lost-Time Claims	Person-Years	Lost-Time Claim Rate
Less than 10 person-years	10,392	514	17,233	3.0
10 to 19 person-years	806	509	11,465	4.4
20 to 39 person-years	604	799	17,216	4.6
40 to 99 person-years	497	1,230	31,185	3.9
100 or more person-years	390	3,380	111,245	3.0
Unspecified [1]	194	28	0	N/A

[1] These are employers with no payroll information or with person-years equal to zero.
Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

[2] Size is measured in terms of person-years.

2.2 Lost-Time Claims by Manufacturing, Processing and Packaging Sub-Sector

Between 2001 and 2005, the Meat, Hides and Pelt Products sub-sector had the highest lost-time claim rate. In 2005, this sub-sector had a rate of 6.5. The Gases, Fertilizer and Petrochemical – Refining and Manufacturing sub-sector had the lowest lost-time claim rate over the five year period, and a 2005 rate of 0.4 (see Table 2.2).

Table 2.2
Lost-Time Claim Rate by Manufacturing, Processing and Packaging Sub-Sector — Alberta: 2001-2005

Sub-Sector	2001	2002	2003	2004	2005
Manufacturing, Processing and Packaging Industries	4.9	4.0	3.7	3.3	
Meat, Hides and Pelt Products	7.9	7.4	7.4	6.1	
Clothing and Textile Products	2.7	3.1	3.1	2.0	
Feed/Seed, Food and Beverage Products	6.3	5.3	5.3	4.4	
Wood Products	5.3	4.5	3.8	3.6	
Furniture and Allied Products	8.1	6.7	6.2	4.9	
Printed and Published Products	1.6	1.9	1.5	1.4	
Foundries (not steel), Rubber and Non-metallic Products	4.3	3.8	3.6	3.5	
Primary Metal (esp. steel) Products	6.3	4.6	4.2	3.9

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2A Meat, Hides and Pelt Products

In 2005, the Meat, Hides and Pelt Products sub-sector had a lost-time claim rate of 6.5 per 100 person-years, almost twice the rate of 3.4 per 100 person-years for all Manufacturing, Processing and Packaging industries (see Table 2.2A).

Table 2.2A
Meat, Hides and Pelt Products — Alberta: 2001-2005

Year	Number of Accounts	Cost of Claims	Person-Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	167	$3,215,054	12,772	19,500	153	1,008	7.9
2002	160	$3,323,168	13,399	18,583	139	992	7.4
2003	156	$3,776,210	13,116	18,540	141	965	7.4
2004	156	$3,503,950	14,636	14,048	96	894	6.1

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2B Clothing and Textile Products

In 2005, the lost-time claim rate for the Clothing and Textile Products sub-sector decreased by 25.1% to 1.5 per 100 person-years, the lowest in the last five years. The duration rate fell from 41 to 40 days lost per 100 person-years (see Table 2.2B).

Table 2.2B
Clothing and Textile Products — Alberta: 2001-2005

Year	Number of Accounts	Cost of Claims	Person-Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	466	$340,784	4,165	3,196	77	114	2.7
2002	465	$425,758	3,718	3,170	85	117	3.1
2003	452	$555,695	3,969	3,499	88	123	3.1
2004	459	$214,944	3,673	1,516	41	72	2.0

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2 Lost-Time Claims by Manufacturing, Processing and Packaging Sub-Sector

Between 2001 and 2005, the Meat, Hides and Pelt Products sub-sector had the highest lost-time claim rate. In 2005, this sub-sector had a rate of 6.5. The Gases, Fertilizer and Petrochemical – Refining and Manufacturing sub-sector had the lowest lost-time claim rate over the five year period, and a 2005 rate of 0.4 (see Table 2.2).

Table 2.2
Lost-Time Claim Rate by Manufacturing, Processing and Packaging Sub-Sector — Alberta: 2001-2005

Sub-Sector	2001	2002	2003	2004	2005

2002	674	$3,724,679	16,277	20,892	128	855	5.3
2003	672	$3,051,075	15,897	16,189	102	846	5.3
2004	647	$2,606,984	16,871	12,255	73	747	4.4

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2D Wood Products

In 2005, the Wood Products sub-sector lost-time claim rate was 3.6 per 100 person-years. The duration rate in 2005 was 72 per 100 person-years, a 7.0% increase from 2004 (see Table 2.2D).

Table 2.2D
Wood Products — Alberta: 2001-2005

2001	1,057	$4,733,078	26,282	32,950	125	1,400	5.3

2004	1,044	$4,049,240	27,497	18,529	67	987	3.6

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2E Furniture and Allied Products

The Furniture and Allied Products sub-sector had a lost-time claim rate of 4.5 per 100 person-years in 2005, the lowest rate during the past five years and a reduction of 9.2% from 2004. The duration rate fell by 24.0% from 142 to 108 days lost per 100 person-years in 2005 (see Table 2.2E).

Table 2.2E
Furniture and Allied Products — Alberta: 2001-2005

Year	Number of Accidents	Cost of Claims	Person-Years	Days Lost	Duration Rate	Average Claim Cost	Lost-Time Claim Rate
2001	550	$602,182	2,589	4,367	169	210	8.1
2002	655	$773,953	2,627	5,627	214	175	6.7
2003	825	$935,252	2,835	5,763	203	175	6.2
2004	948	$849,093	3,116	4,434	142	153	4.9

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

2.2F Printed and Published Products

The Printed and Published Products sub-sector had a lost-time claim rate of 1.7 per 100 person-years in 2005, half the rate of all Manufacturing, Processing and Packaging industries. The duration rate increased slightly in 2005 from 43 to 46 days lost per 100 person-years (see Table 2.2F).

Table 2.2F
Printed and Published Products — Alberta: 2001-2005

Year	Number of Accidents	Cost of Claims	Person-Years	Days Lost	Duration Rate	Average Claim Cost	Lost-Time Claim Rate
2001	563	$575,725	12,519	4,741	38	206	1.6
2002	566	$1,042,767	12,165	6,735	55	227	1.9
2003	539	$765,396	12,863	5,426	42	191	1.5
2004	511	$689,349	13,718	5,856	43	195	1.4

2.2D Wood Products

In 2005, the Wood Products sub-sector lost-time claim rate was 3.6 per 100 person-years. The duration rate in 2005 was 72 per 100 person-years, a 7.0% increase from 2004 (see Table 2.2D).

Table 2.2D
Wood Products — Alberta: 2001-2005

Year	Number of Accounts	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	1,057	$4,733,078	26,282	32,950	125	1,400	5.3
2002	1,042	$5,358,901	27,273	30,387	111	1,221	4.5
2003	1,044	$4,905,542	26,834	23,824	89	1,015	3.8
2004	1,044	$4,049,240	27,497	18,529	67	987	3.6
2005	**1,052**	**$4,863,367**	**27,491**	**19,826**	**72**	**992**	**3.6**

Data Source: 2005 WCB Data. Prepared by Data Development and Evaluation

2.2E Furniture and Allied Products

The Furniture and Allied Products sub-sector had a lost-time claim rate of 4.5 per 100 person-years in 2005, the lowest rate during the past five years and a reduction of 9.2% from 2004. The duration rate fell by 24.0% from 142 to 108 days lost per 100 person-years in 2005 (see Table 2.2E).

Table 2.2E
Furniture and Allied Products — Alberta: 2001-2005

Year	Number of Accounts	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	550	$602,182	2,589	4,367	169	210	8.1
2002	655	$773,953	2,627	5,627	214	175	6.7
2003	825	$935,252	2,835	5,763	203	175	6.2
2004	948	$849,093	3,116	4,434	142	153	4.9
2005	**1,028**	**$843,947**	**3,184**	**3,444**	**108**	**142**	**4.5**

2.2F Printed and Published Products

The Printed and Published Products sub-sector had a lost-time claim rate of 1.7 per 100 person-years in 2005, half the rate of all Manufacturing, Processing and Packaging industries. The duration rate increased slightly in 2005 from 43 to 46 days lost per 100 person-years (see Table 2.2F).

Table 2.2F
Printed and Published Products — Alberta: 2001-2005

Year	Number of Accounts	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-Time Claims	Lost-Time Claim Rate
2001	563	$575,725	12,519	4,741	38	206	1.6
2002	566	$1,042,767	12,165	6,735	55	227	1.9

2.2H Primary Metal (esp. Steel) Products

The lost-time claim rate for Primary Metal (esp. Steel) Products was 4.0 per 100 person-years in 2005. The duration rate fell to a five-year low, from 72 days lost to 70 per 100 person-years, a reduction of 2.5% (see Table 2.2H).

Table 2.2H
Primary Metal (esp. Steel) Products — Alberta: 2001-2005

Year	Number of Claims	Cost of Claims	Person Years	Days Lost	Duration Rate	Lost-time Claims	Lost-time Claim Rate

2.2J Gases, Fertilizer and Petrochemical – Refining and Manufacturing

In 2005, the Gases, Fertilizer and Petrochemical – Refining and Manufacturing lost-time claim rate was 0.4 per 100 person-years, the lowest rate of all sub-sectors in the Manufacturing, Processing and Packaging industries. The duration rate in 2005 remained the same, eight days lost per 100 person-years (see Table 2.2J).

Table 2.2J
Gases, Fertilizer and Petrochemical – Refining and Manufacturing — Alberta: 2001-2005

2001	80	$364,274	9,451	1,861	20	56	0.6

SECTION 3

INJURY AND DISEASE ANALYSIS

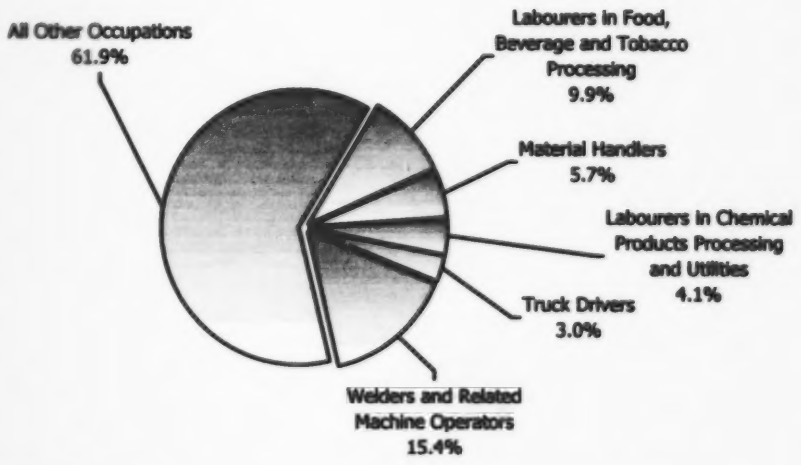
Overexertion was the most common cause for lost-time claims in the Manufacturing, Processing and Packaging industries. Sprains, strains and tears continued to be the leading nature of injury with the trunk being the most commonly injured body part.

This section describes the characteristics of the injured workers and the nature of their injuries or diseases. Tables are provided to enable comparisons of 2005 injuries and diseases in Manufacturing, Processing and Packaging industries with provincial averages and trends. A detailed explanation of the formulas for calculating the indicators of the comparison tables is available in Appendix A.

3.1 Injured Worker Characteristics

In 2005, five occupations accounted for 38.1% of lost-time claims. Welders and related machine operators had the most claims at 15.4%, followed by labourers in food, beverage and tobacco processing at 9.9% (see Chart 3.1A).

Chart 3.1A
Lost-Time Claims by Occupation — Alberta: 2005



Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

Between 2001 and 2005, workers aged 25 to 44 years accounted for 56.2% of all lost-time claims. Young workers aged between 15 and 24 accounted for 19.6% of total claims, while workers aged 45 years and older represented 24.2% of claims (see Table 3.1A).

Table 3.1A
Lost-Time Claims by Age — Alberta: 2001-2005

15-19 Years	546	392	318	325		1,908	5.6%
20-24 Years	1,258	916	876	845		4,782	14.0%

3.2 Nature of Injury or Disease

The nature of injury is used to identify the physical characteristics of the injury or disease. Between 2001 and 2005, 88.6% of lost-time claims were caused by traumatic injuries and disorders. The four most common traumatic injuries and disorders were: sprains, strains and tears, 40.6%, surface wounds and bruises, 14.5%, open wounds, 13.5%, and fractures and dislocations, 7.8% (see Table 3.2A).

Table 3.2A

Data Source: 2005 WCB Data. Prepared by Data Development and Evaluation

In 2005, sprains, strains and tears accounted for 39.1% of all claims in the Manufacturing, Processing and Packaging industries. This was 1.2 times higher than the average percentage of injuries for this nature of injury category for the province. Percentages of injuries in all nature of injury categories were higher than the provincial average, except other diseases, conditions and disorders and infectious and parasitic diseases (see Table 3.2B).

Table 3.2B
Nature of Injury or Disease — Comparison 2005[3]

Nature of Injury or Disease	Manufacturing, Processing and Packaging Industries (2005)	All Provincial Claims (2005)	Number of Times Higher/Lower than Provincial Average
Traumatic Injuries and Disorders	**89.7%**	**90.9%**	**1.4**
Sprains, Strains and Tears	39.1%	47.6%	1.2
Surface Wounds and Bruises	15.7%	11.5%	1.9
Open Wounds	12.9%	9.2%	2.0
Fractures and Dislocations	7.9%	8.9%	1.3
Burns	2.7%	2.7%	1.4
Other Traumatic Injuries and Disorders	11.4%	10.9%	1.5
Systemic Diseases and Disorders	**6.7%**	**4.9%**	**1.9**
Symptoms, Signs and Ill-Defined Conditions	**0.3%**	**0.3%**	**1.4**
Other Diseases, Conditions and Disorders	**0.1%**	**0.2%**	**0.6**
Infectious and Parasitic Diseases	**0.1%**	**<0.1%**	**2.1**
Multiple Diseases, Conditions and Disorders	**<0.1%**	**<0.1%**	**2.0**
Neoplasms, Tumors and Cancer	**<0.1%**	**<0.1%**	**2.1**
Nature of Injury - Unknown	**3.1%**	**3.5%**	**1.3**

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

[3] Number of Times Higher/Lower than the Provincial Average: 1 indicates that the injury percentage of the industries is equal to the provincial average; greater than 1 indicates that the injury percentage of the industries is higher than the provincial average; less than 1 indicates that the injury percentage of the industries is lower than the provincial average. See Appendix A for calculation details.

3.3 Part of Body Injured

Between 2001 and 2005, the trunk was the main injured body part, accounting for over one-third of lost-time claims in the Manufacturing, Processing and Packaging industries, followed by upper extremities, at 31.5% and lower extremities at 16.4%. The most common trunk injury was to the back, including spine and spinal cord, representing 23.1% of the total lost-time claims (see Table 3.3A).

Table 3.3A
Part of Body Injured — Alberta: 2001-2005

Trunk	**2,912**	**2,409**	**2,242**	**2,145**	**12,008**	**35.2%**

[4] Number of Times Higher/Lower than the Provincial Average: 1 indicates that the injury percentage of the industries is equal to the provincial average; greater than 1 indicates that the injury percentage of the industries is higher than the provincial average; less than 1 indicates that the injury percentage of the industries is lower than the provincial average. See Appendix A for calculation details.

3.4 Source of Injury or Disease

The source of injury or disease describes the object or substance that came into contact with the worker and resulted in an injury or disease. Between 2001 and 2005, two primary sources of injury accounted for 36.0% of total claims. Persons, plants, animals and minerals accounted for 18.8% and parts and materials, 17.2% (see Table 3.4A).

Table 3.4A
Source of Injury or Disease — Alberta: 2001-2005

Persons, Plants, Animals and Minerals	**1,321**	**1,224**	**1,358**	**1,268**	**6,432**	**18.8%**

[1] Person – other than injured or ill worker: classifies injuries or illnesses inflicted by family members as well as non-family relations, including co-workers, former co-workers, and patients.
[2] Containers: classifies receptacles that are commonly used to hold, store or carry materials (examples: dishes, cups and glasses, luggage, etc.).

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

In 2005, person – injured or ill worker accounted for 19.6% of all claims in the Manufacturing, Processing and Packaging industries. This was 1.4 times higher than the average percentage of injuries for this source of injury category for the province. The percentages of injuries caused by other persons, plants, animals and minerals was three times that of the province and powered hand tools were 3.6 times higher than the provincial average (see Table 3.4B).

Table 3.4B
Source of Injury or Disease — Comparison 2005[5]

Source of Injury or Disease	Percentage of Industry Injuries	Provincial Percentage	Number of Times Higher/Lower than Provincial Average
Persons, Plants, Animals and Minerals	**19.6%**	**34.5%**	**1.1**
Person - Injured or Ill Worker	17.1%	17.4%	1.4
Person - Other Than Injured or Ill Worker	0.3%	5.0%	0.1
Minerals - Metallic or Nonmetallic (except fuel)	0.2%	0.4%	0.8
Other Persons, Plants, Animals & Minerals	2.0%	1.7%	3.0

[5] Number of Times Higher/Lower than the Provincial Average: 1 indicates that the injury percentage of the industries is equal to the provincial average; greater than 1 indicates that the injury percentage of the industries is higher than the provincial average; less than 1 indicates that the injury percentage of the industries is lower than the provincial average. See Appendix A for calculation details.

3.5 Type of Event or Exposure

The type of event or exposure describes the incident or event that occurred at the time of the exposure that directly resulted in the injury or disease. The two most common types of event or exposure comprising nearly three-quarters of the total lost-time claims in the Manufacturing, Processing and Packaging industries in the last five years are: bodily reaction and exertion, 38.8%, and contact with objects and equipment, 35.5%.

Table 3.5A
Type of Event or Exposure — Alberta: 2001-2005

Type of Event or Exposure	2001	2002	2003	2004	2005	Total Lost-Time Claims	Total %
Body Reaction and Exertion	**3,097**	**2,568**	**2,649**	**2,438**	**2,485**	**13,237**	**38.8%**
Overexertion	1,882	1,459	1,397	1,272	1,313	7,323	21.5%
Bodily Reaction [1]	723	664	741	626	587	3,341	9.8%

[1] Bodily reaction: injuries or illnesses resulting from a single incident of free bodily motion which imposed stress or strain on some part of the body.

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

In 2005, overexertion accounted for 20.3% of all claims in the Manufacturing, Processing and Packaging industries; this was 1.3 times higher than the average percentage of injuries for this type of event category for the province. The percentage of injuries due to being rubbed or abraded was 3.7 times higher than the provincial average (see Table 3.5B).

Table 3.5B
Type of Event or Exposure — Comparison 2005[6]

[6] Number of Times Higher/Lower than the Provincial Average: 1 indicates that the injury percentage of the industries is equal to the provincial average; greater than 1 indicates that the injury percentage of the industries is higher than the provincial average; less than 1 indicates that the injury percentage of the industries is lower than the provincial average. See Appendix A for calculation details.

3.6 Duration of Disability

Duration of disability[7] is intended to reflect the severity of the effects of occupational injury and disease as reflected by the number of days off work. However, the efforts of employers to introduce modified work programs to integrate injured workers more quickly back into the workforce can have a positive impact on workdays lost.

Between 2001 and 2005, claims with duration of disability between one and five days accounted for 45.6% of all claims, followed by six to ten days at 14.2%. Lost-time claims resulting in 51 days or more lost accounted for 12.4% of all claims in the past five years (see Table 3.6A).

Table 3.6A
Duration of Disability — Alberta: 2001-2005

						Total	
Duration of Disability	**2001**	**2002**	**2003**	**2004**	**2005**	**Lost-Time Claims**	**%**

51 Days or More	9.6%	13.4%	1.0
Unspecified	4.7%	3.6%	1.8

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

[8] Number of Times Higher/Lower than the Provincial Average: 1 indicates that the injury percentage of the industries is equal to the provincial average; greater than 1 indicates that the injury percentage of the industries is higher than the provincial average; less than 1 indicates that the injury percentage of the industries is lower than the provincial average. See Appendix A for calculation details.

SECTION 4

OCCUPATIONAL FATALITIES

In 2005 the WCB accepted 19 fatalities in the Manufacturing, Processing and Packaging industries, accounting for 13.3% of all 143 fatalities in the province.

A WCB accepted occupational fatality is defined as the death of a worker, resulting from a work-related incident or exposure, which has been accepted by the WCB for compensation. The WCB classifies occupational fatalities into three general types:

Motor Vehicle Incidents

Motor vehicle incidents typically involve non-industrial vehicles operating on public roads in which the fatally injured worker was either the driver or a passenger. This type of occupational fatality also includes cases involving aircraft, train, helicopter and water vehicle crashes. In 2005, three Manufacturing, Processing and Packaging fatalities accepted by WCB were motor vehicle incidents (see Table 4.0).

Workplace Incidents

Workplace incidents consist of cases in which the worker died at a worksite or as a result of injuries sustained at a worksite. This is the type of fatality that AHRE typically investigates. In 2005, seven of the Manufacturing, Processing and Packaging fatalities accepted by WCB were workplace incidents (see Table 4.0).

Occupational Disease

Occupational disease fatalities consist mostly of recognized occupational diseases, that is, diseases known to be primarily or exclusively work-related. This category also includes heart attacks suffered on the job. Occupational diseases are frequently diagnosed several years after the initial or crucial exposure to the toxic substance, and in such cases, it is difficult to determine when the fatal exposure occurred. *The occupational disease category, therefore, should not be interpreted to reflect present worksite hazardous conditions or exposures.*

Each year the WCB accepts some occupational fatality claims for compensation. Occupational fatality claims that were accepted in a particular year may include fatalities from prior years. In 2005, nine of the fatalities accepted by the WCB in the Manufacturing, Processing and Packaging industries were occupational disease incidents (see Table 4.0).

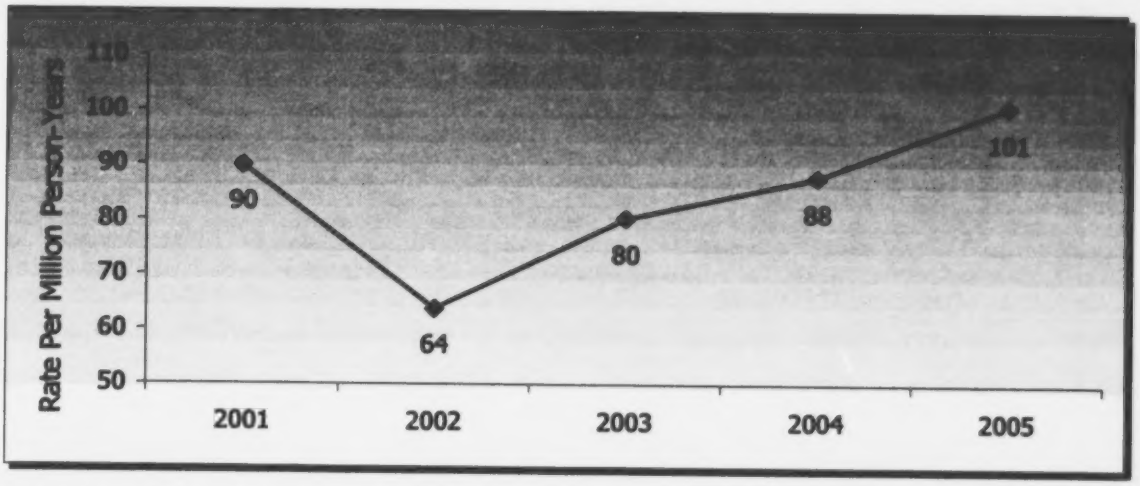
Table 4.0
Types of Occupational Fatalities Accepted by the WCB – Alberta: 2001-2005

Year	Motor Vehicle Incident		Workplace Incident		Occupational Disease		Total
	Number of Fatalities	%	Number of Fatalities	%	Number of Fatalities	%	Number of Fatalities
2001	4	26.7%	2	13.3%	9	60.0%	15
2002	3	27.3%	2	18.2%	6	54.5%	11
2003	1	7.1%	3	21.4%	10	71.4%	14
2004	2	12.5%	6	37.5%	8	50.0%	16
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Total	13	17.3%	20	26.7%	42	56.0%	75

Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

The fatality rate is calculated by dividing the number of accepted fatalities in the year by the number of person-years in that year. The result is expressed as "per million person-years." The 2005 fatality rate increased by 14.8% from 88 per million person-years in 2004 to 101 per million person-years in 2005 (see Chart 4.0).

Chart 4.0
Fatality Rate[9] in Manufacturing, Processing and Packaging Industries: 2001-2005



Data Source: 2005 WCB Data, Prepared by Data Development and Evaluation

[9] Estimates are based upon information provided by the WCB. Fatalities occurring under Government of Canada jurisdiction are excluded from the calculation of the fatality rates.

Each year the WCB accepts some occupational fatality claims for compensation. Occupational fatality claims that were accepted in a particular year may include fatalities from prior years. 5 CERTIFICATES OF RECOGNITION EMPLOYERS

A Certificate of Recognition (COR) is given to employers who develop health and safety programs that meet established standards. Certificates are issued by Certifying Partners and are co-signed by AHRE[10].

In 2005, 4.5% of Manufacturing, Processing and Packaging industries' employers were COR holders. These employers represented 40.5% of the total person-years in the Manufacturing, Processing and Packaging industries. The Gases, Fertilizer and Petro-Chemical – Refining and Manufacturing sub-sector had the highest proportion of COR holders at 18.1%. Nearly two thirds of all person-years in the Wood Products sub-sector were from certified COR holders (see Table 5.0).

Table 5.0
Employers With Valid COR — Alberta: 2005

Manufacturing, Processing and Packaging Industries	**581**	**12,883**	**4.5%**	**40.5%**
Clothing and Textile Products	4	439	0.9%	5.3%
Feed/Seed, Food and Beverage Products	22	631	3.5%	29.1%
Foundries (not steel), Rubber and Non-metallic Products	38	321	11.8%	48.9%

[10] For more information on the COR program visit http://www.hre.gov.ab.ca/cps/rde/xchg/hre/hs.xsl/277.html

Between 2004 and 2005, the lost-time claim rate for COR holders in the Manufacturing, Processing and Packaging industries increased from 2.4 to 2.8, while the rate for non-COR holders decreased from 4.0 to 3.9. For the province, there was a slight decrease in the lost-time claim rate for COR holders between 2004 and 2005, although when rounded, the rate remains unchanged at 2.4. Non-COR holders experienced a decrease from 2.6 to 2.4 in their lost-time claim rates (see Table 5.1).

Table 5.1
Lost-Time Claim Rate for Manufacturing COR Holders — Alberta: 2004 and 2005

COR	2004	1,770	73,895	2.4	14.9%	10,563	431,347	2.4	-3.0%
	2005	2,101	76,322	2.8		11,093	467,041	2.4	
Non-COR	2004	4,311	108,203	4.0	-2.3%	23,869	921,867	2.6	-6.2%

APPENDIX A: TERMS, DEFINITIONS AND FORMULAS

A

Lost-Time Claim

A lost-time claim (LTC) is a claim for an occupational injury or disease that causes the worker to have time away from work, beyond the day of injury. Included are claims receiving reimbursement of full or partial lost wages due to occupational illness or injury, or payment for permanent loss of function.

Person-Years

Person-years are estimates calculated from wage and payroll data provided by account holders to the WCB. Alberta Human Resources and Employment uses data to estimate an average industry wage, and uses the average industry wage and employer payroll data to estimate person-years for each employer and each industry. One person-year is equivalent to one full-time worker working for one year, and can be assumed to equal 2,000 hours worked.

Lost-Time Claim Rate

The lost-time claim (LTC) rate is calculated by dividing the number of lost-time claims by the person-year estimate, and multiplying the result by 100. The LTC rate represents the probability or risk of an injury or disease to a worker during a period of one-year work, that will result in lost-time from work. Comparisons of LTC rates between industries, or between years, can be used to indicate increases, decreases, or differences in this risk.

$$\text{LTC Rate} = \frac{\text{Number of LTCs} \times 100}{\text{Person-Years}}$$

Duration (Days Lost)

The duration of disability is the number of days following the injury or disease for which the worker was disabled and unable to perform normal work duties. This information is obtained for this report from data on compensation days paid on each claim from the WCB. Alberta Human Resources and Employment obtains these data on March 31 of the year following the claim year, and does not update the information, even though many injured workers continue to be disabled beyond this date. As a result, the duration information reported here underestimates the true impact of lost-time injury and disease.

Duration Rate

The duration rate is calculated by dividing the number of workdays lost (disability days) by the person-year estimate, and multiplying by 100. The result is expressed as days lost per 100 person-years, and indicates, in part, the economic impact of occupational injury and disease. Duration rates are not recommended as reliable indicators of full economic cost. In addition, readers are warned that duration rates are highly unstable when based on only a few lost-time claims; it is recommended that the duration rate not be calculated based upon fewer than 30 lost-time claims.

$$\text{Duration Rate} = \frac{\text{Disability Days} \times 100}{\text{Person-Years}}$$

Cost of Claims

Compensation cost of a claim is the reimbursement of full or partial lost wages that a worker received from the WCB due to occupational illness or injury.

WCB Accepted Fatality

An occupational fatality is the death of a worker which resulted from a work-related incident or exposure and which has been accepted by the WCB for compensation. A fatality is counted in the year it is accepted.

Fatality Rate

The fatality rate is calculated by dividing the number of accepted fatalities by the person-years estimate and multiplying the result by one million. The result is expressed as fatalities per million person-years. Fatalities that are found under the jurisdiction of the Government of Canada are excluded before the calculation of the fatality rate.

$$\text{Fatality Rate} = \frac{\text{Number of Fatalities} \times 1{,}000{,}000}{\text{Person-Years}}$$

Number of Times Higher/Lower than the Provincial Average

The number of times higher/lower than the provincial average is used to compare the performance of the industries with the province regarding specific injury or disease. A number less than one indicates that the injury of the industries is lower than the provincial average; if equal to one it indicates the injury of the industries is the same as the provincial average and a number greater than one indicates that the injury of the industries is higher than the provincial average.

$$\frac{\text{Per cent of Total Claims for the Industries} \times \text{Industries' LTC Rate}}{\text{Per cent of Total Claims for the Province} \times \text{Provincial LTC Rate}}$$

Where:

Per cent of Total Claims for the Industries =

$$\frac{\text{Number of LTCs for the Industries (e.g. back injury)} \times 100}{\text{Total LTCs for the Industries}}$$

Per cent of Total Claims for the Province =

$$\frac{\text{Number of LTCs for the Province (e.g. back injury)} \times 100}{\text{Total LTCs for the Province}}$$

NEC Means 'Not Elsewhere Classified'.

UNS Means 'Unspecified'.

APPENDIX B: MANUFACTURING, PROCESSING AND PACKAGING WCB INDUSTRY CODES[11]

1. Meat, Hides and Pelt Products

01103 – Poultry Loading Services
10100 – Meat Processing
10104 – Rendering Plants
17200 – Tanneries

2. Clothing and Textile Products

17900 – Leather Goods – Manufacturing/Repair
21300 – Rope/Carpet – Manufacturing/Repair
22900 – Crests/Pennants – Manufacturing/Repair
22901 – Drapes/Linens – Manufacturing/Repair/Installation
24900 – Wearing Apparel – Manufacturing/Repair

3. Feed/Seed, Food and Beverage Products

02101 – Seed Cleaning Plants
02112 – Egg Grading
10500 – Dairy Products Processing
11202 – Fruit Juice Processing
12301 – Feed Mills
12400 – Flour Mills
12900 – Bakeries
13100 – Food Process – Miscelleneous
13101 – Candy Manufacturing
13300 – Beet Sugar Processing
13500 – Vegetable Oils/Yeast Manufacturing
13900 – Malt Manufacturing
13904 – Pasta Manufacturing
13905 – Vegetables Process/Grade
14100 – Soft Drinks/Water/Ice – Manufacturing
14300 – Liquor/Wine – Manufacturing
14500 – Breweries
37402 – Medicine/Vitamin Manufacturing

4. Wood Products

25100 – Saw Mills/Planing Mills
25401 – Wood Products – Manufacturing
25900 – Peel/Point – Posts
25901 – Treating of Timber

[11] Codes are Workers' Compensation Board industry codes.

27102 – Pulp Mills
27103 – Panelboard – Manufacturing

5. Furniture and Allied Products

26101 – Upholstered Furniture – Manufacturing/Repair
26104 – Furniture Refinishing
42147 – Finishing Carpentry

6. Printed and Published Products

27402 – Envelope Manufacturing
28600 – Printing/Book Binding
28800 – Publish without Printing
28900 – Publish with Printing
86202 – Newspaper/Flyer Distribution
89301 – Electronic Print/Photofinishing

7. Foundries (not Steel), Rubber and Non-metallic Products

16901 – Tires/Rubber Products – Manufacturing
27200 – Asphalt Roofing Products – Manufacturing
29700 – Foundry – Non-ferrous
34100 – Pre-mixed Cement – Manufacturing
34500 – Gypsum Board – Manufacturing
34700 – Concrete Products – Manufacturing
34702 – Artificial Stone Products – Manufacturing
34800 – Transit Mix Operations
35200 – Clay Bricks – Manufacturing
35401 – Fibreglass Insulation – Manufacturing
38500 – Fibreglass Reinforced Products – Manufacturing

8. Primary Metal (esp. Steel) Products

26401 – Metal Furniture Manufacturing
29100 – Steel Manufacturing – exclude Foundries
29102 – Foundries, Iron and Steel
29200 – Steel Pipe Manufacturing
30100 – Steel/Metal Fabrication
30101 – Heat Treating/Stress Relieving
30403 – Metal/Porcelain Products – Coating
30407 – Pipe Cleaning/Coating
30412 – Sheet Metal Shops
30700 – Heat/Cooling Equipment Manufacturing
30801 – Machining
33602 – Switchboard/Electrical Panel – Manufacturing
33606 – Industrial Electric Equipment – Manufacturing
62500 – Steel Service Centre – No Salvage
62700 – Scrap/Salvage Dealers

89401 – Welding

9. Industrial Equipment

16902 – Industrial Belting – Install/Service
38100 – Instrumentation – Manufacturing
62304 – Compressors/Power Unit – Manufacturing

10. Gases, Fertilizer and Petrochemical – Refining and Manufacturing

36500 – Refine – Crude/Used Oil
37201 – Fertilizer Manufacturing/Nickel Refining
37801 – Petrochemicals – Manufacturing
37805 – Industrial Gases – Manufacturing

11. Plastic Products

37301 – Plastic Products – Manufacturing

12. Other Manufacturing, Processing and Packaging Industries

07900 – Peat Moss – Harvest/Process
12304 – Forage Processing
16900 – Rubber Stamps/Stencils – Manufacturing
17901 – Vinyl Goods – Manufacturing /Repair
22101 – Awnings/Tents/Tarps – Manufacturing /Repair
27300 – Cardboard Box/Tubing/Bag – Manufacturing
28603 – Signs/Advertising Displays – Manufacturing
29600 – Aluminum/Metal Extrusion
33500 – Phone Equipment – Manufacturing /Install
33900 – Light Fixtures – Manufacturing /Assembly
33902 – Electrical Components – Manufacturing
38200 – Jewelry – Manufacturing
38201 – Lapidary Services
39300 – Sporting Equipment/Brooms – Manufacturing
39701 – Outdoor Advertising
39901 – Picture Frame, Case, Casket – Manufacturing
69903 – Pottery – Manufacturing
86201 – Window/Store Display Ad Services
89916 – Taxidermists
